Notice that depending on the parameters set the system might warn about some rules been broken, if this happens you will be able to read in red at the bottom of the page what happened and change the filters accordingly, you can also decide to break the rules (if you have the proper permissions to do this) but this is not recommended

This is an example of an exception that can show if you break some rules, as you can see in this case the STaff is not registered in the selected service(s), so in order to fix it you can go and link this Service with this STaff and then try again.

This appointment breaks the following rule(s)

- Staff is not registered in the selected service(s).
