

Accudemia Feedback

Engineerica Systems values your feedback and provides a great resource to collect feature requests. We know our user's ideas make excellent suggestions for the next release of Accudemia. To do this we offer our the Accudemia User Voice website. Simply visit the following website to submit your ideas for improving the software: <http://accudemia.uservoice.com>

Here's how it works:

- You can submit up to 10 ideas or 10 votes whichever comes first.
- You can submit up to 3 votes per idea to weight them.
- This is available to any Tutor at the institution they just use have to use their .edu e-mail address to register.

The user voice is a great way for our users to get their ideas straight to the programmers as well as a great tool for our programming staff to organize and manage the ideas. These ideas, if selected, will be implemented in the next release of Accudemia and you will receive your votes cast on the ideas. More information on how the site works can be found by watching this short [YouTube](http://www.youtube.com/watch?v=j7_Qp62KFHA) presentation: http://www.youtube.com/watch?v=j7_Qp62KFHA
